CE ROHS

POWERplus® Elephant

Dynamo / AC / DC Powered

ECO POWERSTATION/JUMP-STARTER

POWERplus introduces the Elephant, a powerful eco PowerStation and jump-starter which can easily be charged by hand windup dynamo, AC or DC.

Integrated clamp cables

Powerful 200A jump starter

Multi voltage output

Backlight LCD display

1W LED/warning light

The Elephant is a multifunctional powerbank with:

- 230V AC output
- 12V DC output
- 5V USB output

To charge your Elephant you need a powersource - Just wind up the dynamo with the integrated handle or charge it with an optional (flexible) solar cell. For times when you have access to 12 V DC or mains electricity, charge using the included AC or DC adapters. Enjoy the freedom of mobile eco energy!

The Elephant also has a 200A jump-starter on board. This device is really a 'must have' for everyone who enjoys outdoor activities and needs a reliable power source.

Main Technical Parameters:

Item	Parameter	Unit
AC-Charger	Input	100-240
	Output	17
	Ampere	1,5
	Output capacity AC	220/240
		/ 0,5/ 0,4
Charging time fully charged by AC		13
	Charging time fully charged dynamo	6
	Dynamo Arm output	18
		40
		Watt
Operating temperature		-10 ~ 40
	Storage temperature	-20 ~ 60
Battery (Lead Acid)		12
		12
		7
Jump Starter	Voltage	12
	Starting Power	200
	Peak power	2000
	Standby Time	180
	Overcharge protection	Yes
	Maximum input Solar in	17
		Volt
