LED ShowerIndicator

Water Pressure Powered LED SHOWER INDICATOR

The H2O™ Powered Shower Indicator contributes to the awareness of energy saving.

The Shower Indicator gives you a visual indication of the showering time. By reducing showering time, you can save a lot of energy (heating the water) and water. Reducing showering time is the easiest and quickest way to save energy and water.

The Shower Indicator does not require batteries; it is powered by water pressure using H2O™ micro water turbine technology.

The Shower Indicator is a patented and design registered product in the EU. Worldwide patents and design registrations are pending.

EU patent no. EU1038194
EU Designreg. no. 001786104

Automatically switches on after running the faucet and auto switch off after closing the faucet
