

WATER POWER

Water Powered Can Shaped LCD Clock

H2O water powered Can Clock

The H2O water powered can shaped clock uses the latest long life H2O technology to power the clear LCD display .

Simply add water to the body of the can to activate it, and enjoy free energy to clearly see the time. Add water when required, typically every 6 to 12 months.

Features include large hi contrast display all housed in a stylish transparent can.

Available in 4 attractive colors
